Taste for Something Different? Taste4 is Coming Your Way...

Taste4 by Sodexo is our new high school lunch experience focused on FRESH EATS, FLAVOR, FRIENDS and FUN. Created for students, by students. From the name, to the imagery, to the menu itself, students were engaged in every step of the development process that now defines Taste4. Our award-winning chefs created on-trend menus ranging from exotic to comfort, featuring 18 daily entrees to customize in 72 different ways with favorite toppings and amazing sauces. The best meal experiences generally fell into four themes, resulting in Taste4's core menu offerings: Taste4 Pizza, Taste4 Deli, Taste4 Grill, and Taste4 Fast.

Taste4 is about recreating the look and feel of eating your favorite street foods at school. Have a passion for global foods? Try our World of Flavors options. Missed breakfast? Venture off to Overslept, one of our 12 mini-brands. For ease and efficiency, we've created Taste4 stations designed to get meals faster and to leave more time for socializing and interacting with friends and teachers. Choice, Flavor and Nutrition.. What do you have a Taste4?

Keeping the Flu Away

With winter upon us, many have been hit hard with the flu, particularly children and seniors. Schools have been closing across the United States, which means missed school days for students and teachers. Our Sodexo teams understand the importance of infection control and the proper cleaning of our school facilities in keeping students and teachers healthy. We pay particular attention to those areas that are considered "high touch" points such as areas that get a lot of hand contact including door handles and push bars, desk tops and door panels. In elementary schools in particular, the walls in hallways require special attention with frequent cleaning as students run their hands on the walls when walking.

Using disinfectant in our cleaning solutions or disposable disinfectant wipes ensures that all of these high touch areas including desktops are not only dusted but also disinfected to help cut down on the spread of germs. Additionally, we focus on prevention of illness by providing hand sanitizer dispensers, soap dispensers and paper towel dispensers to reinforce sanitary practices.

Above all, the most effective way to prevent spreading germs is to wash our hands throughout the day. Our teams are trained to wash their hands frequently to manage the spread of germs and promote healthy behaviors at all of our districts.

Here are a couple of tips to keep the flu and other ailments away this winter:

- Use disposable paper towels instead of sharing a hand towel during the flu season
- Use non-bleach disinfectant wipes on counters, tables, door handles, toilet handles and any surface that everyone frequently touches. This reduces the likelihood of spreading germs and illnesses.
- Use plastic liners in trash cans and wear nitrile gloves when emptying trash. Germs and bacteria can stay alive in trash cans for hours and it becomes easier to pass illnesses among family members and students. Our Sodexo teams are trained in sanitary waste management, using plastic liners at school and always wearing proper safety gloves when handling trash and waste.

All of these precautions, along with our attention to promoting healthy habits help to create learning environments where students can stay well and stay in school!
